Opening a New Shopping Mall in Bangalore, India

By: Sharanu

June 2021

Business Problem

- Location of the shopping mall is one of the most important decisions that will determine whether the mall will be a success or a failure
- Objective: To analyze and select the best locations in the city of Bangalore, India to open a new shopping mall
- This project is timely as the city is currently suffering from oversupply of shopping malls
- Business question ➤ In the city of Bangalore, India if a property developer is looking to open a new shopping mall, where would you recommend that they open it?

Data

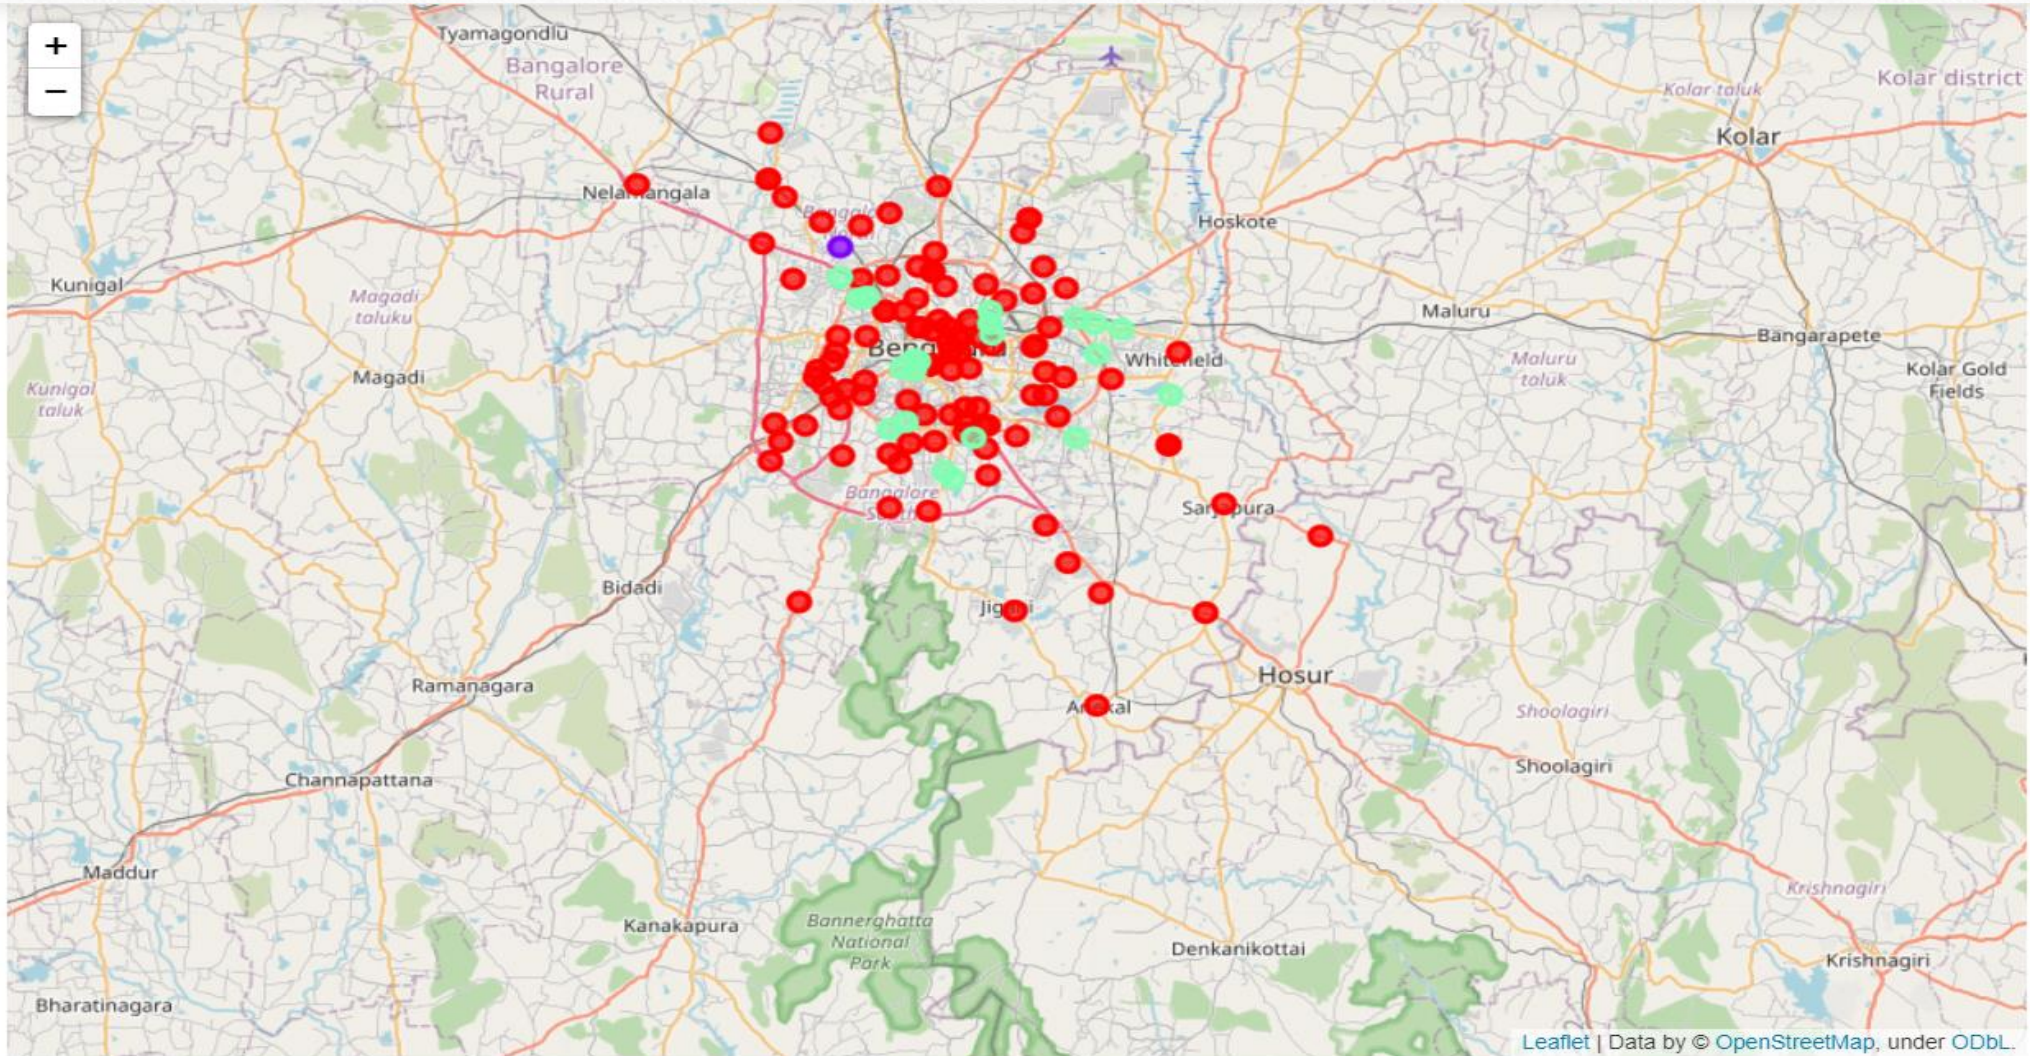

- Data required
 - List of neighbourhoods in Kuala Lumpur
 - Latitude and longitude coordinates of the neighbourhoods
 - Venue data, particularly data related to shopping malls
- Sources of data
 - Wikipedia page for neighbourhoods
(https://en.wikipedia.org/wiki/List_of_neighbourhoods_in_Bangalore)
 - Geocoder package for latitude and longitude coordinates
 - Foursquare API for venue data

Methodology

- Web scraping Wikipedia page for neighborhoods list
- Get latitude and longitude coordinates using Geocoder
- Use Foursquare API to get venue data
- Group data by neighborhood and taking the mean of the frequency of occurrence of each venue category
- Filter venue category by Shopping Mall
 - Perform clustering on the data by using k-means clustering
- Visualize the clusters in a map using Folium

Results

- Categorized the neighborhoods into 3 clusters :
 - Cluster 0: Neighborhoods with low number to no existence of shopping malls
 - Cluster 1: Neighborhoods with moderate number of shopping malls
 - Cluster 2: Neighborhoods with high concentration of shopping malls

Discussion

- Most of the shopping malls are concentrated in the central area of the city
- Highest number in cluster 2 and moderate number in cluster 1
- Cluster p0 has very low number to no shopping mall in the neighborhoods
- Oversupply of shopping malls mostly happened in the central area of the city, with the suburb area still have very few shopping malls

Recommendations

- Open new shopping malls in neighborhoods in cluster 0 with little to no competition
- Can also open in neighborhoods in cluster 1 with moderate competition if have unique selling propositions to stand out from the competition
- Avoid neighborhoods in cluster 2, already high concentration of shopping malls and intense competition

Conclusion

- Answer to business question: The neighborhoods in cluster 0 are the most preferred locations to open a new shopping mall
- Findings of this project will help the relevant stakeholders to capitalize on the opportunities on high potential locations while avoiding overcrowded areas in their decisions to open a new shopping mall

THANK YOU
